## **The MOST Appreciated Course You Can Give an Employee**

Each day most of us spend substantial times in a very hazardous place – our roads and highways. Some of us drive to get to work and back to home – safely. Some of us drive professionally as service technicians or as courtesy drivers.

The roads are a hazardous environment, however taking this Defensive Driving Course can help to reduce the risk of collision, injury or even death.

This Defensive Driving Course has been designed and produced by Fleet Safety International and is one of a series of driving courses. Fleet Safety International is recognized by the Government of Alberta and many insurance companies.

Students learn the latest in Defensive Driving theory and safe driving programs that reinforces good driving habits and behaviours. All material is research based and delivered using full multi-media formats.

## **Course Includes:**

- Key Driving Definitions
